UK & China CNC Machining

CRDM offer a fast and economic *CNC machining* service for Ferrous and Non Ferrous metals, Plastics and Resin Model Board.

CRDM's unique UK 'In – House' & China sourced CNC machining service offers you a choice of manufacturing routes to suit your individual budget and lead-time.

Using 3, 4 and 5 axis CNC controlled VMC, wire and spark EDM, CRDM can supply you with 'block' or 'space' models right up to highly tolerance metal and plastic components direct from your CAD data.

One offs to low-medium volume production up to 1m x 1.5 m x 1m meets most of our client requirements.

- Block Models

- Working Prototypes

- Aluminium, Steels, Brass Components

- Engineering plastic components

- Foundry Patterns

- Vacuum Forming Patterns

- GRP/Carbon Fibre Lay-up Tools

- Tooling Inserts

- EDM Tooling

- Pressure Die-cast Tooling

Equipment

2 X Mikron VCP 600
1 X Charmilles Wire EDM CNC x 5 Axis
1 X Charmilles Spark EDM CNC
3R Tooling System
Delcam & Mastercam Software
